ADRIEN GARDÈRE

Born in France in 1972, Adrien Gardère creates relevant and innately understandable objects and spaces. Trained as an architect, he works to logically adapt cultural reference points in contemporary mediums whether they be as furniture, wall coverings or museum installations.

Since 2004, Gardère has served as Artistic Director for visual arts exhibitions held alongside The Kennedy Center's "World Stages" international live performance programming.

TRANSITIONAL

Available in elegant shades of bronze or grey
Melampo complements any modern environment
with its design at a crossroad of classic and modern
lighting - a fixture capable of complementing solid
or patterned backgrounds.

INGENUITY

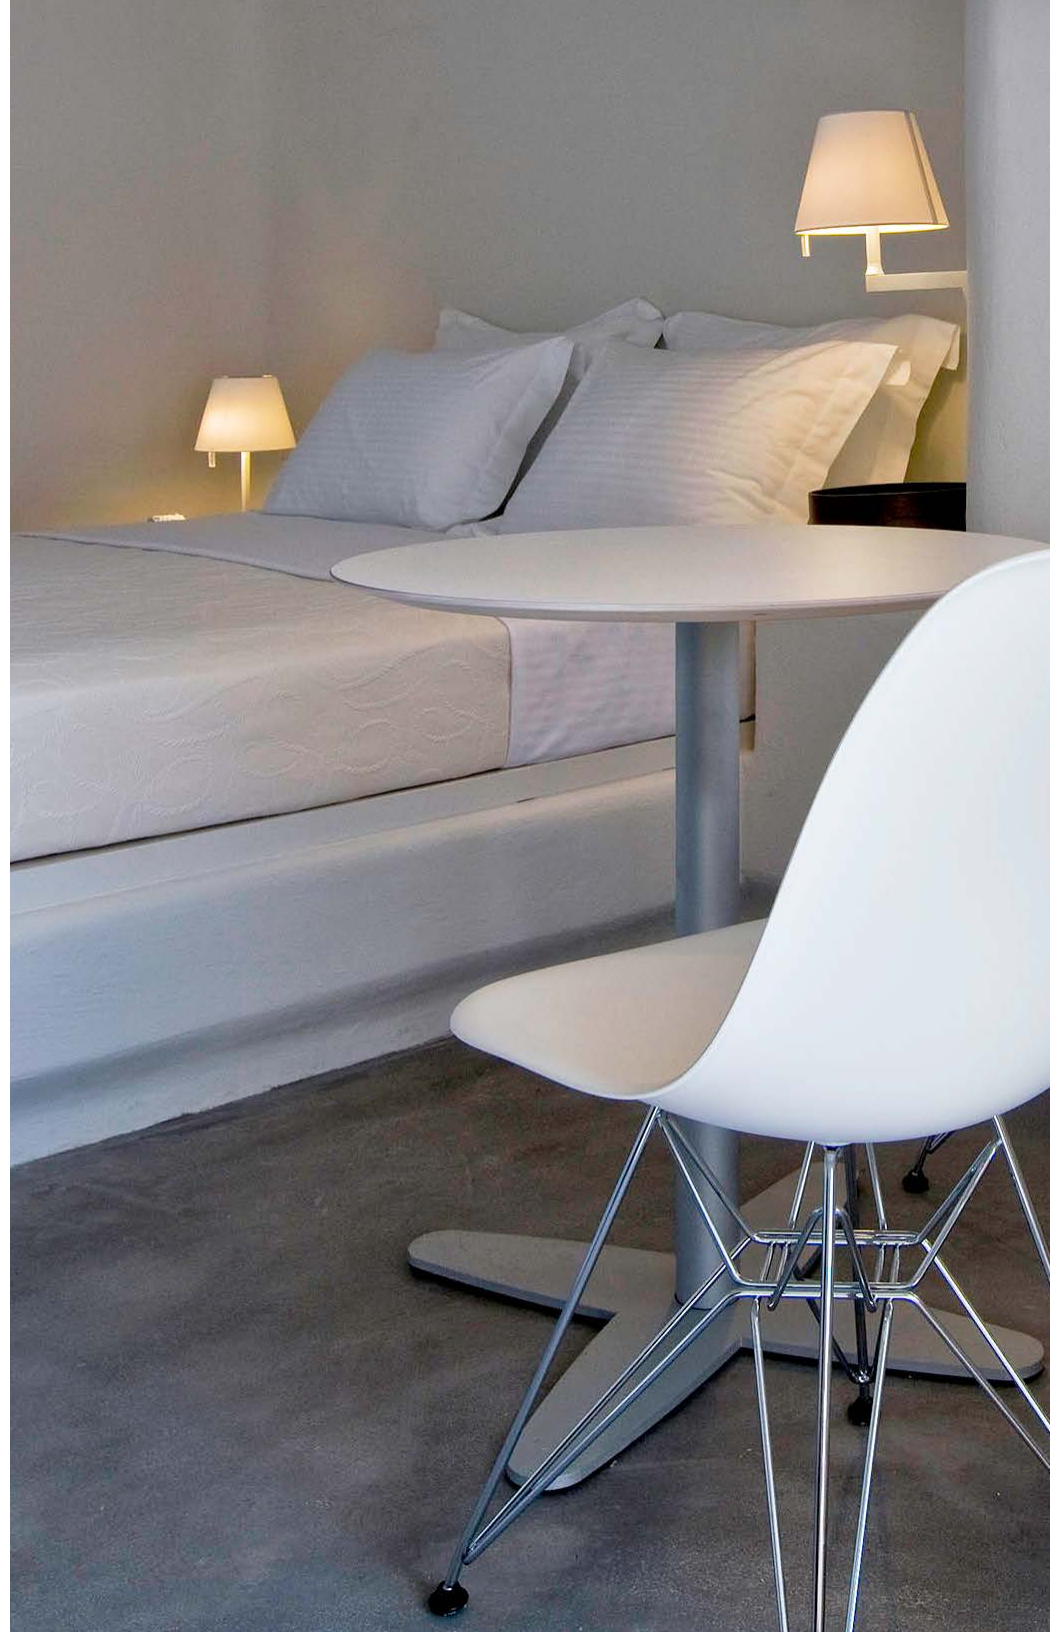

Melampo's functionality lies in its adaptable and flexible form. Its shade allows a beautiful metamorphosis into three positions to meet the need of any light direction or focus: straight downward light, slanted downward light, or upward light. The mini table and wall versions adjust to two positions: full upward and slanted downward.

TIMELESS

Melampo's shape is reminiscent of the timeless go-to lamp shape. Composed of a zamac base, a matte finish, and a satin polycarbonate lampshade, Melampo transcends time.

MELAMPO table
