Tolomeo Mega Floor

Tolomeo with Shade

A modern, adjustable outdoor lamp stands in a lush green field under a twilight sky. The lamp has a thin, silver-colored pole that connects to a horizontal arm, which is further extended by a second arm to hold a glowing, glass-enclosed lamp head. The background shows a darkening sky with soft clouds and a distant treeline.

# Tolomeo goes outdoor

Using LED technology, the attention must be focused not only on energy consumption and light efficiency, but above all on the quality and quantity of the distribution of the light.

In fact the advantage of the LED is that it emits 100% light flow into the direct hemisphere, eliminating dispersion and waste in other directions. This means that in order to obtain illuminance of 1250 lux on the work surface, with an incandescent light source a power of 100W is necessary, while with a LED source 10W is sufficient, with a 90% energy saving.

### **Materials**

Aluminum-coated steel base; aluminium frame and diffuser.  
System of spring balancing.

**PATENT PENDING** n.11161968.0

# Motion Sensor for additional energy saving

Tolomeo LED and Tolomeo Mini LED features a Motion Sensor option detecting moving objects and people and turning the light on or off accordingly, saving energy and extending lamp life.

> 30% EFFICACY THAN PREVIOUS VERSION

**LED LONG LIFE & RELIANCE**

L80 (10K) > 60.500 hr

Tolomeo LED, Midi LED and Mini LED Tunable White combines the advantages of LED technology with those of Tunable White technology, enabling numerous variations of white light to be obtained, with different intensities and varieties of colour temperature, with a range from 2,300K (warm light) to 10,000K (cold light).

10000 K

“I designed the Tolomeo in 1986. Perhaps I ought to say that I invented it, as in point of fact the idea for a new mechanism came before the lamp was created.”

Michele De Lucchi

Brought out in 1987 and designed for Artemide by Michele De Lucchi with Giancarlo Fassina, the Tolomeo was an immediate bestseller, consolidating a working relationship that continues to this day. Inspired by traditional balanced arm lamps like the famous Naska Loris, his challenge was to combine an iconic and “domestic” form with innovative technologies and materials, adapting it to a wide variety of uses and settings. Today it is a well-known symbol of the modern object, commonly seen in houses, offices and hotels, on the desks of architects and on photographic and even film sets.
